PROFESSIONAL SUMMARY

Computer Engineering graduate with 6 months of UAE experience in IT Support and Web Development, providing technical support, troubleshooting hardware and software issues, maintaining business systems, and developing full-stack web applications. Skilled in user support, system configuration, business operations, and digital solutions, with a proactive and adaptable approach to learning new technologies. Seeking an entry-level IT opportunity where I can contribute to business operations while continuing to grow in enterprise IT and modern technology environments.

AREAS OF EXPERTISE

- **IT Support:** Desktop and Laptop Support, End-User Support, Software Troubleshooting, Windows Configuration
- **Networking:** DNS, Static IP and DHCP Concepts, Basic Network Diagnostics
- **Systems and Operations:** ERP Development, CRM Features, Business Process Automation, Reporting, and Data Management
- **Web Development:** React, TypeScript, JavaScript, Node.js, Express.js, API Integration
- **Database and Tools:** SQL, Git, GitHub, VS Code
- **Deployment:** Vercel, Hostinger, GoDaddy, Domain and DNS Configuration, Production Support
- **AI-Assisted Development:** Use of generative AI tools for rapid prototyping, debugging, code review, technical documentation, and workflow optimization

PROFESSIONAL EXPERIENCE

IT Support Specialist / Web Developer
Middle Class Tourism, Abu Dhabi, UAE | January 2026 – June 2026

● Supported daily business operations by troubleshooting software issues, configuring user systems, and maintaining business applications.● Enhanced the company's web application by implementing new features, resolving technical issues, and supporting production operations. ● Organised digital records, data-entry activities, and document-processing workflows to support accurate and accessible business information. ● Coordinated with different departments to identify technical requirements and deliver practical website and system improvements.

Freelance Full-Stack Web Developer
Independent Projects | September 2024 – Present

- Designed and developed websites and full-stack web applications for businesses across multiple industries.
- Built corporate websites, landing pages, and SEO-friendly content platforms.
- Translated business requirements into practical features, workflows, and digital solutions.
- Handled application development, deployment, hosting, DNS configuration, maintenance, and technical support.

ADDITIONAL EXPERIENCE

Sales and Operations Assistant, Part-Time Family Business

● Built upon years of involvement in our family-owned business by taking on regular responsibilities in sales, procurement, inventory management, and customer service. ● Assisted customers, suppliers, and contractors with product inquiries and order processing. ● Coordinated inventory replenishment and supplier communication to support daily operations.
